OUR TEAM

A team of engineering students is designing a cutting-edge solar car, combining lightness, efficiency, and technical skill. Powered solely by the sun, our vehicle travels thousands of kilometers while meeting road safety standards. Driven by passion and supported by our partners, we are building a more sustainable future.

WORLD CHAMPIONS!

The Eberle-Selwood Championship Arrow Cup is awarded every two years to the team that has accumulated the most points through its performance in solar car competitions around the world. Thanks to our rigor, we won this award—a true international recognition of our technical excellence. More than just a result, it reflects the hard work and precision behind every decision.

Eberle-Selwood
Championship Arrow Cup

- 130 km/h Top speed
- 160 kg Weight
- 5.25 kWh battery
- Single occupant
- 6m² of solar panels
- Autonomy 350 km without sun | ∞ km with sun

INTERNATIONAL COMPETITIONS

Teams cover 3,200 km on open roads, often through mountainous terrain across the United States, testing solar car performance and energy strategies under real-world conditions.

3200 km

The **Formula Sun Grand Prix** is a closed-circuit race where teams aim to cover the greatest distance possible in 24 hours, spread over three days, using only solar energy.

24h race

3000 km

**WORLD
SOLAR
CHALLENGE**

A legendary 3,000 km race across the Australian desert. Teams face extreme conditions: strong winds, abrasive sand, and scorching temperatures. Renowned for its prestige, it brings together the world's best teams, all determined to push the limits of solar energy.

LET'S ILLUMINATE THE PATH TOWARD A SUSTAINABLE FUTURE

VISIBILITY

Enjoy extensive exposure, reaching both our large academic community and an international audience through our competitions and media presence, with a following of over 5,000 subscribers.

SOCIAL IMPACT

By partnering with Éclipse, you directly support innovative educational initiatives and the promotion of environmental sustainability, thereby enhancing your image as a socially responsible company committed to addressing today's ecological challenges.

INNOVATION

Partner with a cutting-edge renewable energy project and gain a head start in conversations about innovation and sustainability with a project that has been evolving since 1992.

TALENT AND COLLABORATION

Partnering with us provides the opportunity for mutually beneficial meetings and exchanges. By familiarizing us with your products and services, you are investing in your future ambassadors.
